C++/Win32 Development Engineer

AIRTAG is a leading provider of NFC / contactless solutions. AIRTAG provides payment & marketing solutions to retailers & mobile carriers.

AIRTAG is a fast growing and dynamic company where each employee builds and enhances its professional and personal objectives. Each person has their own mission and chooses the necessary tools in order to accomplish their work to the best of their ability. Structured around a flat organisation chart, AIRTAG has a dynamic and responsive corporate culture.

We stimulate personal and professional growth. We encourage creativity, professional expertise, dedication and hard work with the team's objective in mind.

At AIRTAG, each team member brings a valuable contribution to the company's development.

We are looking for a C++/WIN32 developer with experience of at least 2 years in the windows application development.

- Experience with C/C++/C# on Win32 (STL, MFC, ATL, .NET)
- Good knowledge in multi-threaded library.
- Experience porting application on WIN98 / WINNT4 / WIN XP.
- Skills in drivers development / integration
- Fluent in English
- Job based in Paris
- Attractive package
